 **Yangon, Myanmar**

## SKILLS

### ● Technical skills

Java, Spring, html, css, javaScript, Hibernate, angular, typeScript, mongodb, mySql

### ● Language

English, Japanese, Burmese

## INTERESTS

I like music and movie. Especially good quality movies.

## OBJECTIVE

I love to create things that live on the internet.  
My goal is to always build web applications that are scalable and efficient under the hood while providing engagement.  
And, as I'm a back-end developer, I would like to create a scalable and testable API for the web or android application that's assign to.

## EDUCATION

### ● University of Computer Studies, Yangon

Computer Science

Dec 2016 - March 2019

- - study computers and algorithmic processes, including their principles, their hardware and software designs, their applications, and their impact on society.

## ACTIVITIES
